Supported Languages

First Stop Health (FSH) virtual care inherently enables equity of access, such as reducing transportation and removing geographic barriers. But we also think about improving access through multi-modality use, cost and language availability.

200+

First Stop Health virtual care is available in 200+ languages, including American Sign Language (ASL). A translator fluent in the preferred language can join the virtual visit to best accommodate the member.

First Stop Health Care Teams include Spanish-speaking Primary Care, Urgent Care, and Mental Health providers.

Service overview flyers and other worksite items can be translated to up to 3 languages.

Prior to the start date, FSH Account Managers can host online informational sessions with a live Q&A and can translate slides if needed.
