

High Utilization

Employees love using our Telemedicine

Before COVID-19, only 11% of patients said they were comfortable seeking virtual care – that number has risen to nearly 76% now¹. To help you meet the increasing telemedicine demand First Stop Health does all the heavy-lifting and onboarding. As a result, we achieve an average **44% utilization** – the highest in the industry.

How we drive utilization:

- Targeted, year-long employee engagement
- Smart, personalized communications
- Easy onboarding and maintenance via an online dashboard
- Convenient access to care with our mobile app, website or by phone
- Quarterly reporting to measure savings

Your employees will feel better, faster and your company saves money from avoided emergency room, urgent care and doctor's office claims.

The doctor listened to my symptoms and had a treatment plan quickly. With three kids and a full-time job making traditional appointments just isn't always possible. I highly recommend First Stop Health!

- Deanna B., Patient, Pennsylvania
