

**125%  
Savings  
Guaranteed**

## High quality care that delivers healthcare savings

We believe that telemedicine should work for employers and their employees. If your employees aren't using your existing telemedicine benefits, you aren't getting your money's worth and your employees aren't reaping the benefits virtual care has to offer.

First Stop Health (FSH) is different. We focus on patient experience to drive utilization of our Telemedicine service that results in better health for employees and lower healthcare costs. That's why we are one of the only telemedicine companies to offer a 125% Savings Guarantee. We're so confident our program can provide you with a 25% ROI that we offer a refund of the difference if you don't.

### How We Do It:

We believe that adding a new employee benefit should be simple. That's why we do all the heavy lifting to onboard employees and encourage telemedicine use throughout the year.

After onboarding, we send personalized engagement and ongoing communications to employees and provide employers with quarterly reporting on utilization and savings.

### What employees get:

- Access to doctors 24/7 for diagnosis and treatment of everyday conditions
- Time back and money saved by avoiding the ER, urgent care center or doctor's office
- Simple healthcare access via mobile app, website or a phone call

### What employers get:

- Targeted employee engagement throughout the year — administered and paid for by FSH
- Ongoing program support and administration from a designated FSH Account Manager
- Happy, healthy employees

To be eligible for the Savings Guarantee, clients must: 1) allow and cooperate with FSH to engage its employees; 2) provide email addresses and/or mobile phone numbers for >75% enrolled employees; and 3) update eligibility data every 90 days throughout term. If terms are not met, FSH may modify the terms of the guarantee.
