

Talk to a
doctor anytime,
anywhere

People love First Stop Health's Telemedicine

Patients save time and feel better faster thanks to 24/7 access to caring, licensed doctors.

Using our mobile app, website or with a phone call, patients avoid waiting rooms and paperwork – and get the quality, convenient care they deserve.

“Great tool and time-saver. Doctor called me back within five minutes. Next stop, the pharmacy on my way home from the office. Wonderful!”

– Mark V., Patient, Kansas

Our Telemedicine Difference

Custom Employee Engagement

Telemedicine only works if employees use it. First Stop Health provides employers with targeted communications to encourage use throughout the year.

44% Average Utilization

Most telemedicine providers only see 2-10% utilization. First Stop Health's engagement plan fuels high utilization so employees actually benefit from the service.

125% Savings Guarantee¹

Instead of going to the ER or urgent care, patients talk with a doctor using our mobile app, website or phone. We're confident our service will result in lower healthcare costs so we offer employers a savings guarantee.

Easy Patient Experience

We make telemedicine simple. Patients don't need to pre-register — they can contact a doctor whenever and wherever they need to.

Virtual Mental Health

Support employees' mental health by adding our Virtual Mental Health service. Licensed counselors can help with depression, anxiety, substance abuse and more.

Patients Get Treated Fast

Don't let employees spend time in a waiting room or traveling to the doctor's office. Our average wait time is less than 3 minutes.

¹ For every \$1 an employer spends on First Stop Health Telemedicine, we guarantee they will receive \$1.25 in real savings. It's the same as achieving a 25% ROI, but we guarantee the savings or we'll refund the difference.
