

# Flu season is around the corner

The flu can be treated if it is caught within the first 48 hours. Our doctors can guide you on the right course of action, and even prescribe medication when necessary. Request a visit if you experience:

- Fever
- Chills
- Headache
- Runny nose
- Cough
- Sore Throat

**But we don't want you to get sick! The best protection from the flu is to get your flu shot.** If you have any questions about getting one this year, our doctors are here for you.
